Fighting fungal pest: Chickpea could give mustard a tip or two

By Sunderarajan Padmanabhan

New Delhi, February 17: Researchers from the National Institute of Plant Genome Research (NIPGR), New Delhi, and Assam Agricultural University in Jorhat, led by NIPGR plant biologist Dr. Muthappa Senthil-Kumar, are looking for a better way to manage blight, a plant disease caused by fungus.

A report on the work has been published in The Hindu Businessline. The link for the article is:
