## KIIT organised Hands-on Training Programme on Product Validation and Quality Control

KIIT University, Bhubaneswar organised a hands-on training programme on 'Product Validation and Quality Control' at KIIT-Technology Business Incubator from 2-6 March, 2020 with the support of National Biopharma Mission, Department of Biotechnology, Government of India.

The workshop is in line with the mandate of the National Biopharma Mission to support drug discovery and early product development as well as enhance capabilities of human resource in biopharmaceuticals as well as biomedical devices to a globally competitive level over the next decade. Biotech Consortium India Limited (BCIL) is the Management Agency for organizing skill development programmes across the country.

The workshop gave a comprehensive overview of different analytical techniques used in biopharmaceutical quality control laboratories, workflow for product characterization profile; specifications and acceptance criteria. In addition, product validation including reliable solution for identifying product degradation and monitoring them throughout production and also comprehensive portfolio of solutions for determining impurities such as host cell, metals and residual solvents was also covered at the event.

The KIIT-Technology Business Incubator Bhubaneswar which is one of the best bioincubators with state-of-the-art facility and infrastructure in the country. Programme was conducted jointly by trainers and faculty from Agilent Technologies, KIIT-Technology Business Incubator and other leading organizations. Pamphlet is attached for your kind reference.
