## Special interview with Dr. Deepti Trivedi at inStem as part of Brain Awareness Week

Keeping the brain awareness week in full tempo, Dr. Deepti Trivedi, the head of the Fly (*Drosophila*) facility on inStem campus highlighted the ongoing brain research on *Drosophila*. She spoke about the use of *Drosophila* as a well-defined genetic tool and its significance in advancing understanding of brain function and a means to explore development, function, and diseases associated with brain.
