

Students & general public experience research & clinical activities of SCTIMST

The Sree Chitra Tirunal Institute for Medical Sciences and Technology (SCTIMST), Trivandrum, an institute of national importance under Department of Science and Technology, organised an Open Day for the general public and students to provide them with an insight on the research and clinical activities of SCTIMST, at its Biomedical Technology (BMT) Wing in Poojappura.

The Open Day witnessed a large crowd, with more than 1000 students and other interested people attended the open day, where experts showcased devices and their development processes that are going to transform Indian medical device industry.

Prototype of devices, finished models, demonstration videos, and operation of various diagnostic instruments were displayed for the general public. There were also opportunities to visit selected laboratories and to interact with engineers, scientists, and clinical staff.

The Biomedical Technology (BMT) Wing of SCTIMST has been actively involved in the research, development, evaluation, and technology transfer of life-saving medical devices for the past several decades. Many of the products developed by SCTIMST are available in the domestic as well as international market.
