**6th International Conference on Climate Services (ICCS6) from February 11-13, 2020 at IITM, Pune**

6th International Conference on Climate Services (ICCS6) to be organized jointly by The Indian Institute of Tropical Meteorology (IITM) under an international effort coordinated by Ministry of Earth Sciences, Government of India and Global Framework for Climate Services, World Meteorological Organization and the Climate Services Partnership (CSP) will be held at the **Indian Institute of Tropical Meteorology (IITM), Pune from 11 to 13 February 2020.**

The objective of the ICCS6 conferences is to develop relationships between and among national and regional meteorological services, national and local governments, intergovernmental and non-governmental organizations, research institutes and the actors that make up the climate service community based on the private sector. It would provide a unique opportunity to share skills, experiences, and expertise with an active climate service network. The theme of the conference is to advance the knowledge and practice of climate services for climate resilience. The conference presentations will cover issues related to the production and use of climate services in a range of social and economic sectors.

The conference would help convene the international community to assess the current state to design, implement, and work on the impact/outcome/impact of climate services, shared knowledge and lessons, and emerging examples of good practices to identify gaps and challenges to be addressed in future work.
