

## Earthquake tremors felt in Delhi and surrounding areas

Mohammad Faiyaz Anwar

The National Capital Region and its adjoining areas have experienced a low-intensity earthquake of magnitude 3.5 on the Richter Scale. Reporting the incident, the National Center for Seismology (NCS) under the Ministry of Earth Sciences has traced the epicenter of this tremor to near the Delhi-Uttar Pradesh border. A few weeks ago an earthquake was felt at this place. –However, there has been no loss of life or property reported thus far on the recent one.

This is the third low-intensity earthquake happening in the national capital within a span of a month. The earthquake on April 13 was also of low intensity, measuring 2.7 on the Richter scale.
