**Great opportunity to work with NIOT for the Development of
Deep Ocean Exploration Technologies**

Mohammad Faiyaz Anwar

National Institute of Ocean Technology (NIOT) is providing an excellent opportunity to the Indian consultants to collaborate with NIOT in its ocean science research project management activities. These would include development of new deep ocean mining technologies, Manned and Unmanned Underwater Vehicles and research on Gas Hydrate.

The objective of NIOT is to develop innovative ideas and promote technology development in activities related to Ocean Engineering and Ocean Resource Utilization. Secretary of the Ministry of Earth Sciences, Madhavan Rajeevan said that NIOT intends to develop technology for man mission to a depth of 6,000m for underwater exploration and Deep-Sea Mining. These technologies would enhance the ability to explore marine resources which are vital for the growth of blue economy and thus making it a major contributor to India's economy.

Ocean researcher consultants can visit the following link for more details. The last date to submit application is 22/05/2020
