IMD Weather Alerts

New Delhi, September 14, 2020 (Vigyan Samachar)

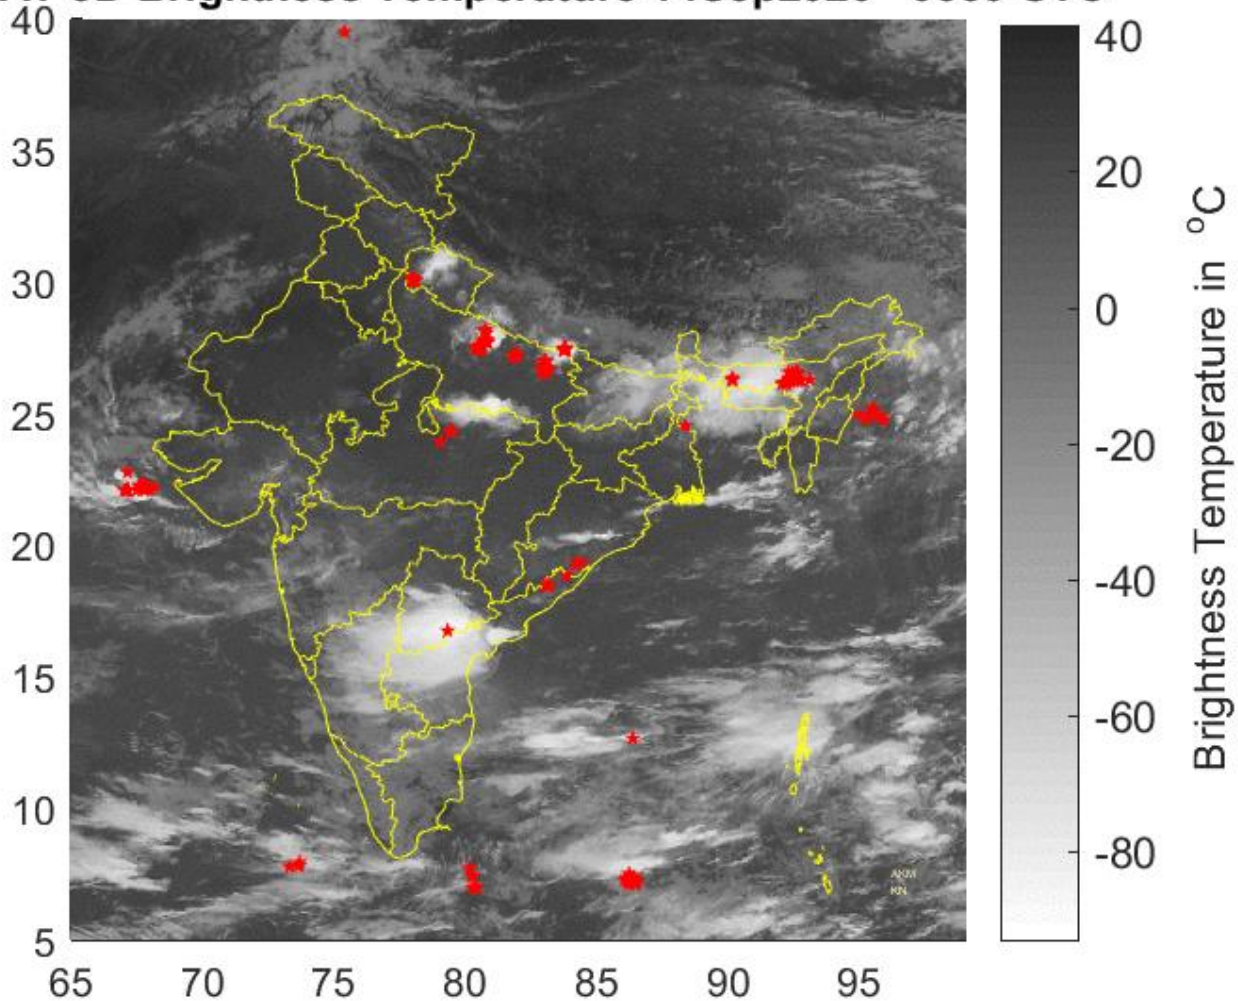

India Meteorological Department (IMD) is issuing an alert for Telengana predicting extremely heavy rainfall today, 14 September 2020. There is a possibility of very to very heavy rainfall in Coastal Andhra Pradesh and Yanam during next 24 hours.

As per IMD, monsoon trough is active and lies to the south of its normal position and its eastern end is very likely to remain to the south of its normal position till 17 September, 2020.

Due to formation of a low pressure over Westcentral Bay of Bengal & adjoining north Andhra Pradesh coast very likely to move west-northwestwards during next 3 day is creating conditions that are favorable for heavy rainfall over Coastal Andhra Pradesh, Telengana, Maharashtra, Gujarat, Coastal & north Interior Karnataka and Kerala and Mahe during next 4-5 days; over south Odisha & south Chhattisgarh today, the 14 September, 2020, said IMD.

INSAT 3D Brightness Temperature 14Sep2020 0530 UTC

As per the National Weather Forecasting Centre, IMD forecast, there is a heavy probability of thunderstorms with lightning in Bihar, East Uttar Pradesh, West Madhya Pradesh and Coastal Andhra Pradesh, and Yanam during next 12 hours.
