**Conference on International Commission on Clouds and Precipitation (ICCP)-2020
Postponed**

International Commission on Clouds and Precipitation (ICCP)-2020 conference has been postponed until further notice due to the COVID-19 pandemic. The abstract submission system will be reopened later this year to allow for the current abstraction to be modified or withdrawn or to present new abstracts.

The conference aims to provide a platform for presenting scientific research and advances in the area of clouds and precipitation. The ICCP conference also strives to enhance exchange of ideas within the international community on clouds and precipitation.

ICCP 2020 is being organized by the International Commission on Clouds and Precipitation (ICCP) in association with the host institution, Indian Institute of Tropical Meteorology (IITM), Ministry of Earth Sciences (MoES), Government of India, Pune, Maharashtra. The ICCP is a commission of the International Union of Meteorology and Atmospheric Sciences (IAMAS), a consortium of the IUGG (International Union of Geodesy and Geophysics).

The conferences also provide opportunity for young scientists and students in the field to interact and increase their knowledge. IITM would like to encourage students (numbering approximately 200) to participate and present their results and interact with eminent scientists and groups.
