Universal Stage: Principles and Practice Workshop
- -17-18 January, 2020

A two-day workshop on 4-axis Universal Stage Technique to revive interest and utilize this method for petrological and structural studies to be conducted at the Department of Geology, Savitribai Phule University of Pune, during, during 17-18th January 2020.

The 4-Axis U-Stage remains the most elegant of all accessories for the petrographic Microscope. With little effort, it can determine many optical properties, including twin law Used in the identification of minerals, especially in thin section Plagioselle feldspars, as well as in Petrofabric measurement. This workshop is part of the training and developmental activities of the Geological Society of India, Western Chapter, Pune. The workshop aims to provide a greater opportunity for students, research scholars, and faculty to learn and revise technologies related to the 4-Axis Universal Stage.
