

**5 Day All India Weather Summary and Forecast Bulletin by National Weather Forecasting Centre, India
Meteorological Department, Ministry of Earth Sciences**

National Weather Forecasting Centre of India Meteorological Department, Ministry of Earth Sciences regularly provides weather advisories and forecasts for entire India which can be accessed [here](#).

As per the [latest Weather Summary Bulletin issued by IMD](#) at 13:30 hrs IST on 17th January, 2020, over the isolated places in **Uttarakhand**, there is a probability of heavy rain/snow today (17th January, 2020) accompanied with thunderstorm, hail and lightening. There is likelihood of same weather over East Uttar Pradesh, East Madhya Pradesh, Bihar and Chhattisgarh. Dense to very dense fog very likely in some pockets over Punjab, Haryana and Chandigarh; in isolated pockets over Delhi, Odisha and West Madhya Pradesh, and Dense fog in isolated pockets over **Uttarakhand, Uttar Pradesh, West Rajasthan and East Madhya Pradesh**.

On **18th January, 2020, thunderstorm accompanied with lightning** very likely at isolated places over **Jharkhand**. Dense to very dense fog very likely in some pockets over Punjab, Haryana and Chandigarh; in isolated pockets over Delhi and West Madhya Pradesh, and Dense fog in isolated pockets over **Uttarakhand, Uttar Pradesh, West Rajasthan Odisha and East Madhya Pradesh**.

On **19 January, 2020 heavy rain/snow very likely at isolated places over Arunachal Pradesh**. Thunderstorm accompanied with lightning likely at isolated places over **Jharkhand, Arunachal Pradesh, Assam & Meghalaya and Nagaland, Manipur, Mizoram & Tripura**.

As per IMD: "The Western Disturbance as a cyclonic circulation lies over North Pakistan and adjoining Jammu & Kashmir at 3.1 km above mean sea level. The trough aloft now runs with its axis at 5.8 km above mean sea level roughly along longitude 71°E to the north of latitude 34°N. There is a cyclonic circulation between 1.5 & 3.6 km above mean sea level that lies over West Uttar Pradesh & neighbourhood. Under the influence of these systems, **isolated to scattered rain/snow most likely to continue over Jammu & Kashmir & Himachal Pradesh and fairly widespread to widespread rain/snow with heavy falls and thunderstorm accompanied with lightning & hail over Uttarakhand during next 24 hours**.

A fresh Western Disturbance would likely to affect Western Himalayan Region and plains of northwest India from 20th January. Under its influence, scattered to fairly widespread rain/snow likely over western Himalayan region **during 20-21 January, 2020**.

There would be a gradual fall in temperatures by 2-3°C over north India and no significant change in Maximum & Minimum temperatures over rest of the parts of the country till 22nd January, 2020.

From 22nd January, onwards till 24th January, 2020, scattered precipitation is likely over Western Himalayan region and isolated to scattered rainfall likely over East Madhya Pradesh, Chhattisgarh, Bihar, Gangetic West Bengal & Arunachal Pradesh. Weather would likely to be dry over remaining parts of the country during this period.

The following table released by IMD on 17th January 2020 provides a 5 day rainfall forecast
