

IMD predicts thunderstorm with light intermittent rain at many parts of the country

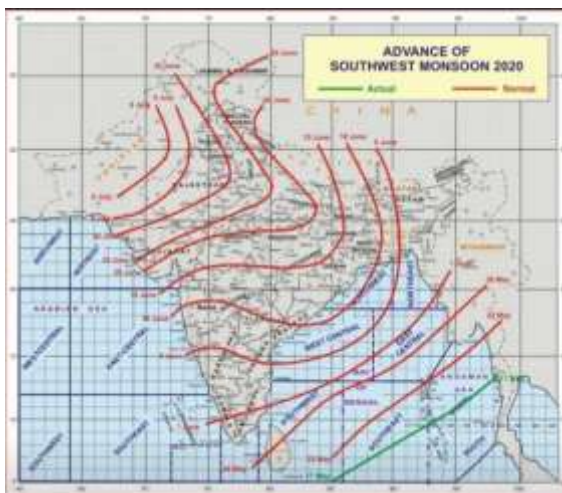

Mohammad Faiyaz Anwar

As per the National Weather Forecasting Centre, India Meteorological Department (IMD), Ministry of Earth Sciences forecast, there is heavy probability of thunderstorms with light intermittent rains in many parts of the country during the next five days.

The following places are very likely to experience this:

Jammu and Kashmir, Ladakh, Gilgit-Baltistan, Muzaffarabad, Himachal Pradesh, Chhattisgarh, Bihar, West Bengal, Sikkim, Andaman and Nicobar Islands, Assam, Bihar, Meghalaya, Nagaland, Manipur, Mizoram and Tripura, Coastal Andhra Pradesh, Yanam, Telangana, Coastal and South Interior Karnataka and Kerala, Mahe, Jharkhand, Himalayan, Arunachal and Lakshadweep.

As per IMD, Cyclone Amphan has created conditions that are favourable for the arrival of the southwest monsoon 2020 in the SE Andaman Sea and neighbourhood in advance.

The green line with the date modifies the advance onset lines for the monsoon and the red lines are the normal onset lines for the monsoon. However, Rajasthan, Madhya Pradesh, Vidarbha, and Gujarat are likely to experience conditions of a heat wave from 18 to 22 May 2020.
