

Testing status of COVID-19 in India as on 21 April 2020

Government of India is taking all necessary steps to reduce the spread of the virus in our country. The most important factor in preventing the spread of the virus locally is to empower the citizens with the right information and taking precautions as per the advisories being issued by Ministry of Health & Family Welfare. As per Indian Council of Medical Research (ICMR), 462,621 samples from 447,812 individuals have been tested as of 21 April and 18,985 individuals have been confirmed positive. COVID-19 infection rate in India is reported to be 1.7, less than most of the affected countries.
