New Delhi, Jan 14: Dr. Manas Kumar Santra, scientist at the National Centre for Cell Science (DBT-NCCS) in Pune, was recently elected Fellow of the prestigious National Academy of Sciences, India (NASI), the first science academy of India.

Dr. Santra's research is aimed at understanding the biology of cancer at the molecular level, more specifically, the role of gene regulation by epigenetic factors, proteins like ubiquitin ligases and other cellular factors, in cancer. The research outcomes of Dr. Santra and his team have been published in leading international journals like Proceedings of the National Academy of Sciences of the United States of America (PNAS), Journal of Biological Chemistry (JBC), and Cell Death & Disease.
