

DBT- inStem celebrates 'Brain Awareness Week'

New Delhi, April 07: DBT-Institute for Stem Cell Science & Regenerative Medicine (DBT-inStem), Bengaluru celebrated 'Brain Awareness Week' from March 15-21, 2021. It was organised by Dr. Bhavana Muralidharan an investigator at inStem.

The institute hosted a series of podcasts with scientists from inStem, NCBS, NIMHANS and DBT-NBRC. In the daily podcasts, scientists spoke on their specialities. The topics covered mental illness, addiction, Parkinson's, non-invasive treatment methods, brain imaging, personalized medication for mental illness, and the possibilities of iPSCs (induced pluripotent stem cells) in diagnosis and treatment of brain disorders with special focus on modelling brain disorders-in-a-dish. The campaign was driven through its social media platforms (Twitter and Facebook).
