Workshop on Molecular Neurobiology: From Genes, Neurons to behavior in health and disease – 24th to 29th February 2020

By Sunderarajan Padmanabhan

New Delhi, February 25: Regional Centre for Biotechnology is holding a six-day “*Workshop on Molecular Neurobiology: From Genes, Neurons to behavior in health and disease*” at its campus in Faridabad from February 24 to 29. The workshop is focussed on the current progress of neuroscience and neurobiology on health and disease issues aiming to cover various model organisms used in the field.

The programme includes discussion on recently emerging findings in affective neuroscience with their immediate clinical or translational relevance and sharing of information regarding career opportunities in neuroscience for benefit of students. Leading neurobiologists from different parts of India are participating.
