

Newton Bhabha Fund Researcher Links Workshop Grants 2020

The British Council through Newton Bhabha Fund in collaboration with Department of Biotechnology (DBT) has announced 'Researcher Links Workshop Grant 2020'. The Workshop has been designed to promote international development relevant research and professional development of early career researchers.

The programme includes financial support to bring together a United Kingdom and India cohort of early career researchers in a workshop with a potential for long term sustainability. Institutions including both not-for-profit higher education institutions and publicly-funded research organizations that have leading or established researchers are eligible to apply as lead institutions. Leading or established researchers from both apply to be Principal applicants (as defined by the European Commission). Each proposal must have two Principal applicants, one from UK, and another from India. Applications are invited in priority areas agriculture and allied areas, environment and circular bio-economy, biotechnology-education, health, AI and machine learning.

The UK partner University UK International (UUKi) offers a partner matching service to help connect Newton partner country researchers to potential UK partners for *Researcher Link workshop Grant* call. Proposals can be submitted latest by 12 June 2020(16:00 h of UK time).
