

Collaborative efforts by APF, NCBS, inStem to enhanced testing for COVID-19

Azim Premji Foundation (APF), National Center for Biological Sciences (NCBS) and Institute For Stem Cell Science and Regenerative Medicine (inStem), Bengaluru entered partnership for increasing COVID 19 testing for inStem. This joint venture would facilitate cost free COVID 19 testing to a large number of people belonging to disadvantaged and marginalised communities. The partnership will use NCBS-TIFR and inStem's high-capacity technical capabilities and skilled scientific personnel.

This collaboration will also help in conducting research into new and innovative methods for testing for the SARS-CoV-2 virus. The three organisations will collectively augment testing infrastructure and facilities to deal with the COVID-19 pandemic using new and innovative methods.
