

DBT-IBSD takes up new research initiatives on Phytopharmaceuticals to fight COVID19

New Delhi, Oct 05: Apart of efforts to strengthen the national efforts against the COVID 19 pandemic, DBT-Institute of Bioresources and Sustainable Development (DBT-IBSD) has taken up new research initiatives on Phytopharmaceuticals Mission and has established a Centre of Excellence for Phytopharmaceuticals.

The Institute is extensively working on exploration and documentation of a large number of medicinal plants of north east India for scientific intervention for the characterization of bioactive compounds having antiviral and other therapeutic activities. It is planning to establish a phyto-markers library useful as standard reference compounds for evaluation of phytopharmaceuticals.
