

DBT-NBRC to hold popular webinar on Covid 19 and the brain

New Delhi, Oct 05: Often people are worried whether COVID19 can affect mental health, mental function or cause neurological issues. We all often get concerned with the reports in popular media that people recovering from Corona virus infection suffer from issues like - confusion, inability to concentrate, loss of smell & taste and carry out normal brain functions.

Hon. Professor, UCLAN, U.K.

Link for the webinar will be provided soon

Organized by
NATIONAL BRAIN RESEARCH CENTRE

in Association with

CSIR PENSIONERS WELFARE ASSOCIATION

As part of its outreach activities to engage with the general public, DBT-National Brain research Centre, Manesar in association with CSIR Pensioners Welfare Association (HQs) has organized a webinar for creating awareness on the subject for its staff, members and general public.

The webinar titled 'COVID and the Brain' is by M.V.Padma Srivastava, one of India's most accomplished neurologists at AIIMS New Delhi. Dr. Srivastava is Head of the Department of Neurology and Chief, Neurosciences Centre at AIIMS. She is also Honorary Professor at University of Central Lancashire, U.K.

The webinar, to be held on October 10, will provide an excellent opportunity to know how the brain gets affected and what are the possible adverse effects of COVID19 on the human brain. There will be an opportunity to ask questions and seek clarifications for doubts and concerns on this important aspect.
